Professional Summary

Highly disciplined and detail-oriented Secondary School Graduate transitioning into technology. Currently undergoing foundation-level training at Simvo Africa to build baseline technical skills. A creative problem solver committed to structured learning, logical syntax troubleshooting, and mastering core web fundamentals step-by-step.

Core Attributes & Foundations

- **Foundational Concept Studies:** Structural web page layouts, syntax formatting, and link management.
- **Core Traits:** High personal discipline, strict attention to details, and analytical problem-solving.
- **Professional Skills:** Independent project setup, workflow consistency, and rapid knowledge adoption.

Education & Training

Software Engineering Foundations Student | Simvo Africa

July 2026 – Present (Current Training: 2-3 Weeks)

- Studying basic web page architecture, container elements, and structural asset styling.
- Learning layout structure troubleshooting, tag closures, and asset linking principles.

West African Senior School Certificate (WASSCE)

Secondary School Graduate • Enugu, Nigeria

Practice Projects

Personal Developer Portfolio Website

- Developed a responsive layout using raw element positioning blocks as a primary coursework project.
- Implemented native application protocols like system email and dialer shortcuts alongside social media links.
- Debugged script actions and fixed icon rendering assets using Font Awesome configurations.
